

Installation and Maintenance Manual

IM 869-2

Group: **Applied Air Systems**

Part Number: **IM 869**

Date: **April 2018**

Maverick® I, Maverick® II, Rebel®, Rooftop and Self Contained Remote Wall-mounted Sensor

Part Number 113117701

Part Number 113117801

Overview

There are two types of sensors:

- Analog Sensor with timed override button
- Analog Sensor with timed override button and set-point adjustment

Hardware Provided

- Remote wall-mounted temperature sensor
- Black insulator sheet
- 1/16" hex key wrench
- Two Allen screws
- Two wall mounting screws
- Friction-tight knob (analog sensor with set-point adjustment only)

Mounting Instructions

1. Remove the friction-tight knob from the wall sensor (only on Analog sensor with set-point adjust).
2. Remove the cover using the 1/16" hex key wrench to drive in each of the two Allen screws.
3. Select an appropriate location for mounting the sensor. Mount approximately five feet above the floor on an interior wall. Avoid direct sunlight, heat-producing appliances, and vents or ducts.
4. Bring appropriate number of wires from Terminal Block 2 of the unit through the insulator sheet and then through the hole in the center of wall sensor.
 - a. Two wires for the analog sensor with timed override
 - b. Three wires for analog sensor with set-point adjustment.
5. Connect wire terminals as shown in each figure represented by their respective sensors.
6. Mount the sensor and insulator sheet using the hardware provided

The analog zone/space sensor consists of a 10K ohm type II thermistor with a tenant override button and optional setpoint adjustment knob (depending on selected sensor). Wire terminal numbering for Rebel sizes 3-15, all sizes Maverick II, Self Contained, and Rooftop (e.g. RPS) are the same. Terminal numbers for Rebel sizes 16-28 tons are different from the other MicroTech® III rooftop units. Corresponding wiring diagrams are shown in [Figure 1](#) and [Figure 2](#) for Rebel, Maverick II, Self Contained, and Rooftop (MicroTech III equipment). On Maverick I units the sensor wires are directly wired back to the DDC controller as shown in [Figure 3](#) and [Figure 4](#).

Daikin Applied Training and Development

Now that you have made an investment in modern, efficient Daikin equipment, its care should be a high priority. For training information on all Daikin HVAC products, please visit us at www.DaikinApplied.com and click on Training, or call 540-248-9646 and ask for the Training Department.

Warranty

All Daikin equipment is sold pursuant to its standard terms and conditions of sale, including Limited Product Warranty. Consult your local Daikin Applied representative for warranty details. To find your local Daikin Applied representative, go to www.DaikinApplied.com.

Aftermarket Services

To find your local parts office, visit www.DaikinApplied.com or call 800-37PARTS (800-377-2787). To find your local service office, visit www.DaikinApplied.com or call 800-432-1342.
